I have been working on  
this confusing magic door  
for a few days now, and  
I can't see what the  
problem is. I can put in  
10 syllables just fine and  
it shoots me all around  
the room. I have decided  
to just hand it down to  
another mage since  
obviously I am doing  
something wrong when  
everything is working  
right -- I sent it with  
my mistress Elkeie.
